PROJECT & BUSINESS MANAGER | PROCESS IMPROVEMENT & IMPLEMENTATION

PROFESSIONAL SUMMARY

Project, Product, and Business Analysis professional with experience leading digital products, software delivery, ERP implementation, integrations, and operational programs from planning and process mapping through requirements, testing, implementation, Go-Live, and continuous improvement. Translates complex business processes into workflows, specifications, acceptance criteria, data flows, and coordinated delivery plans. Aligns Engineering, UX, QA, Data, Operations, business stakeholders, senior leaders, and vendors. Earlier HPE business analysis, SAP R/3 implementation, and founder-led operations add strong analytical, service, process, and stakeholder judgment without claiming insurance-domain experience.

PROFESSIONAL EXPERIENCE

CallApp | Product Manager, Branded & Verified Caller Identity | March 2023 - Present

- Own strategy, roadmap, and end-to-end delivery for a B2B SaaS product, coordinating initiatives from discovery and requirements through development, release, measurement, and iteration.
- Translate business, customer, Support, Sales, operational, and data needs into process maps, requirements, specifications, workflows, acceptance criteria, dependencies, and plans.
- Align Engineering, UX, QA, Data, Operations, business stakeholders, senior leaders, and vendors on priorities, testing, implementation, risks, and outcomes.
- Led integrations with Green Invoice, Isracard, PayMe, and CRM systems, reading technical documentation, defining requirements, validating flows, and resolving issues across invoicing and payments.
- Use Jira and Figma for requirements and delivery coordination and GA4 and Firebase for KPI and funnel analysis; mobile traffic share increased from 10% to 60% after targeted UX and campaign-flow changes.
- Use AI-assisted workflows for research, specifications, documentation, solution exploration, working prototypes, and technical feasibility validation.

Tapuhi | Founder, Product & Operations Manager | January 2017 - December 2022

- Founded and led a D2C eCommerce product and operation, with responsibility for the platform, customer experience, suppliers, staffing, budget, fulfillment, service, and go-to-market execution.
- Managed multiple vendors and workstreams across software, marketing, logistics, packaging, payment processing, credit-card services, and operational delivery.
- Acted as product owner and primary client for an external development company, leading requirements, UX, delivery reviews, acceptance testing, launch, bug resolution, and new features.
- Established an operating center, recruited and managed approximately 20 employees, and created procedures for intake, order processing, picking, packing, delivery, returns, and customer service.

HP (HPE) | Business Analyst | January 2015 - December 2016

- Gathered business requirements, modeled operational data, mapped complex production processes, and translated findings into clear workflows, analytical tools, and process improvements.
- Collaborated across operations, planning, business, and technical stakeholders and built analytical tools and reports supporting data-driven decisions and cost reduction.

HP (HPE) | Material Planner Analyst | January 2013 - December 2014

- Managed supply-chain planning across six operational divisions, including inventory monitoring, supplier coordination, exception handling, and VMI oversight; wrote work manuals and trained four logistics specialists.

SAP WIN | Project Manager | February 2012 - January 2013

- Managed a year-long, on-site SAP R/3 implementation across Production and Accounting modules, leading requirements, work planning, developer-user coordination, testing, training, Go-Live, and post-launch support.

EDUCATION

Ben-Gurion University of the Negev | B.Sc. in Industrial Engineering & Management | 2008 - 2012

Coding Academy Israel | Full-Stack & Frontend Development | July - November 2022

SKILLS & TOOLS

Project & Process: Process mapping, requirements, specifications, plans, dependencies, risks, acceptance testing, implementation, Go-Live and improvement

Analysis & Tools: Business analysis, operational data, Jira, Figma, MS Project, Excel, SAP R/3, GA4, Firebase, basic SQL

Stakeholders & Languages: Cross-functional facilitation, presentations and vendor management | Hebrew: Native; English: Fluent
